Devon Parrott, now 16 years old, was diagnosed with Long QT type 3 syndrome over 6 years ago. He was walking to class when he collapsed in the hallway but he woke up on his own. He is lucky to be alive. His life has changed, but after having an ICD implanted he is doing well and doing things he loves. When you hear of a young person that has collapsed with no apparent reason or warning signs, that is usually long QT or some other type of SADS (Sudden Arrhythmia Death Syndrome) Condition. Unfortunately, many don't make it or have to be resuscitated. On August 15th, 2015 Devon was at the movies when he went into cardiac arrest and was saved by his device twice. He was admitted to the hospital again and was given a new drug under observation. He is doing great now and a true blessing to his friends and family. We are motivated more than ever to screen more kids and possibly save someone else's life in the process!

Our 6th year was a success for Devon's Beat raising over \$12,500 and screening 207 kids, making our new total 568 kids screened. We currently have two schools on our list to hold a screening.

FACTS ABOUT SADS:

• Each year approx. 4,000 children & young people die suddenly & unexpectedly due to cardiac arrhythmias.

Proceeds will benefit the SADS Foundation & Heart Screenings
